

TRANSFORMING DATA Essentials

Lesson 6 Objectives

- 6.1 Use the SQL REPLACE function within SQL code.
- 6.2 Use the CONCAT function and || operator within SQL code.
- 6.3 Recognize the meaning of the acronyms ETL and ELT.
- 6.4 Use the worksheets area to load a text file into a Snowflake worksheet.

Lesson 6 - Additional Information

In addition to the named objectives, this lesson also covers:

- Basic Function syntax
- Using required and optional arguments in the REPLACE function
- Renaming a column in a SELECT statement using “AS”
- The difference between a SQL SELECT statement and a SQL UPDATE statement
- Using the double-forward slash “//” to put notes or comments into code
- Mapping ETL concepts into different lines of a SQL UPDATE statement

Lesson 6: Transforming Data

LESSON OUTLINE

- Watch a Video
- Complete a Hands-On Lab
- Answer Quiz Questions
