

RESOURCE: Partner Connect In-Account Snapshot

The screenshot shows the Snowflake Partner Connect page. At the top, there's a navigation bar with icons for Databases, Shares, Data Exchange, Warehouses, Worksheets, History, Account, Partner Connect (which is circled in red), Help, and Notifications. Below the navigation bar, the title "Snowflake Partner Connect" is displayed, followed by a sub-headline: "Get started with loading and analyzing your data in minutes. Automatically connect your Snowflake account with our partner applications available for a free trial." A note says, "Check back often as we will be adding new partners regularly." The page lists ten partner integrations in two rows:

Partner	Description
Fivetran	Built for analysts, 5-minute setup, great schemas, Snowflake platinum partner.
alooma	Connect all of your data with Alooma, the enterprise data pipeline built for the cloud
talend Stitch	Stitch moves data into Snowflake in minutes. Unlimited sources and a free-forever tier.
SIGMA	A spreadsheet UI for Snowflake. Easily explore and analyze all your data.
Periscope Data	Periscope Data brings data science and advanced analytics to the world of BI.
snapLogic	SnapLogic's platform empowers organizations with intelligent application and data integration.
Rivery	Rivery creates an automated data pipeline to collect & transform data from all sources.
CHARTIO	Connect to the #1 self-service data analytics platform for ease-of-use & speed to insights.
MATILLION	Snowflake data transformation. Achieve new levels of simplicity, speed, scale and savings.
Dataguisse	Data security and privacy automation for compliance with GDPR, CCPA, PCI and more.

Get to Partner Connect by logging in to your Snowflake Account and clicking the Partner Connect option in the ribbon.

RESOURCE: Partner Connect Introductory Video

If you have already used Partner Connect, or feel you understand its purpose quite well, you will probably want to skip this video.

If you do not fully grasp what Partner Connect is, you can watch this video to get a quick overview.

<https://www.youtube.com/watch?v=8sO53KczJ4M>

The screenshot shows a YouTube video player with the following details:

- Title:** Getting Started on Snowflake with Partner Connect
- Views:** 3,777 views • Aug 2, 2018
- Thumbnail:** A screenshot of a web browser showing the Snowflake login page. The URL is https://pm.snowflakecomputing.com/console/login#. The page features the Snowflake logo and a login form with fields for User Name (ROSS) and Password, and a Log In button.
- Player Controls:** Standard YouTube controls for play, volume, and progress (0:01 / 5:16).
- Video Content:** The video content itself is a screenshot of a web browser showing the Snowflake login page.
- Video Player Buttons:** Like (15), Dislike (0), Share, Save, and More.
- Channel Information:** Snowflake Inc. (4.59K subscribers) with a SUBSCRIBE button.
- Description:** Through Partner Connect, you can start loading your data into Snowflake with just a few clicks. After clicking on the Partner Connect button, select from the available partner applications, point to existing data sources and start loading data in minutes. Get started today!
- Call-to-Action:** SHOW MORE

RESOURCE: Ecosystem Online Documentation

Take a look at the online documentation to check for the most up-to-date information and learn about the functional categories we use to classify partners and connectors.

Look for the special symbol that denotes Partner Connect partners.

DOCS » CONNECTING TO SNOWFLAKE » OVERVIEW OF THE ECOSYSTEM PREVIOUS | NEXT

Overview of the Ecosystem

Snowflake works with a wide array of industry-leading tools and technologies, enabling you to access Snowflake through an extensive network of connectors, drivers, programming languages, and utilities, including:

- Certified partners who have developed cloud-based and on-premises solutions for connecting to Snowflake.
- Other 3rd-party tools and technologies that are known to work with Snowflake.
- Snowflake-provided client interfaces such as [SnowSQL \(CLI\)](#), [Python \(connector\)](#), and [Node.js, JDBC, and ODBC \(drivers\)](#).

These topics describe the solutions in more detail. The solutions are listed both alphabetically and grouped according to the categories shown in the diagram below:

The diagram illustrates the Snowflake ecosystem partners, categorized into four main groups:

- DATA INTEGRATION:** TMMData, Datameer, IBM DataStage, IBM COGNOS, ATSCALE, MicroStrategy, dbt_, Qlik, QuickSight, ORACLE Cloud, TIBCO, StreamSets, Segment, ajilius, tableau, Power BI, MODE, pentaho, einstein analytics, data virtuality, ATTUNITY, MATILLION, Fivetran, Stitch, Microsoft Azure, aws, TRIFACTA, alooma, RVERY, snapLogic, Fivetran, looker, SIGMA, ThoughtSpot, CHARTIO, SISENSE, Dubole, dataiku, DataRobot.
- BUSINESS INTELLIGENCE:** IBM COGNOS, ATSCALE, MicroStrategy, Qlik, QuickSight, ORACLE Cloud, TIBCO, tableau, Power BI, MODE, pentaho, einstein analytics, Periscope Data by Sisense, Metabase, SIGMA, ThoughtSpot, CHARTIO, SISENSE.
- ADVANCED ANALYTICS:** dbt_, tableau, Power BI, looker, SIGMA, ThoughtSpot, CHARTIO, SISENSE, Dubole, dataiku, DataRobot.
- ADVANCED ANALYTICS:** Microsoft Azure, aws.

RESOURCE: Snowflake Partners Web Page

Take a look at the Snowflake's Web page that talks about Partners.

Partners that develop software or SaaS options are called **Technology Partners**.

Snowflake has a second kind of partner, listed on the Partners web page. Visit this page and scroll down to read about **Solutions Partners**.

<https://www.snowflake.com/partners/>

The screenshot shows the Snowflake Partners web page. At the top, there is a navigation bar with links for 'Questions? 1-844-766-9355', 'Support', 'Community', 'Company', 'ENGLISH', and a search icon. Below the navigation is a large banner featuring a laptop keyboard and a smartphone, both displaying the Snowflake logo. The main title 'SNOWFLAKE PARTNERS' is prominently displayed in the center. A sub-section titled 'TECHNOLOGY PARTNERS' is visible below, along with logos for various partners: AWS, Microsoft Azure, Google Cloud, Tableau, Looker, Informatica, and Talend. A descriptive text block states: 'Snowflake unlocks the full potential of data warehousing in the cloud for a broad array of tools and partners. From data management to analytics, our partnerships and integrations enable customers to leverage Snowflake's flexibility, performance, and ease of use to deliver more meaningful data insights.'
